**Categories:** Blue Category

We need to talk before reaching out to Vintra. It appears their pricing is somewhat fluid and if we can get it cheaper, all the better.

Jared, Erin and Becky:

Thank you for the presentation. I believe that Vintra will assist you in building on an existing strength of LPD and a need that supports our agency's mission. You are clear to begin the process of purchasing the software.

In order to sustain this rather expensive endeavor, I need data to evaluate the successes. This can be combined with studies that have been completed in the past showing increased clearance rates, etc.

As you work through the purchase, please get me 3 to 5 ways in which we can objectively evaluate it.

Have a great weekend.

Jeff
